

Datasheet

Coil pack 4-cylinder

The coil pack 4-cylinder is an ignition module suitable for 4-cylinder engines. It is a discoil unit, what means it works with 2 ignition signals, which results in 2 cylinders firing at the same time. This coil pack comes with an integrated amplifier and is therefore suitable for direct connection with a Carrot ECU.

Connections

Pin 1	Ignition signal cylinder 1-4
Pin 2	12V supply
Pin 3	Ignition signal cylinder 2-3
Pin 4	Ground

Ordering information

Coil pack 4-cylinder - C-020-0005	€95,-
Connector coil pack 4 cylinder- C-050-0043	€10,-
