

Datasheet

Crimping tool Carrot main connector

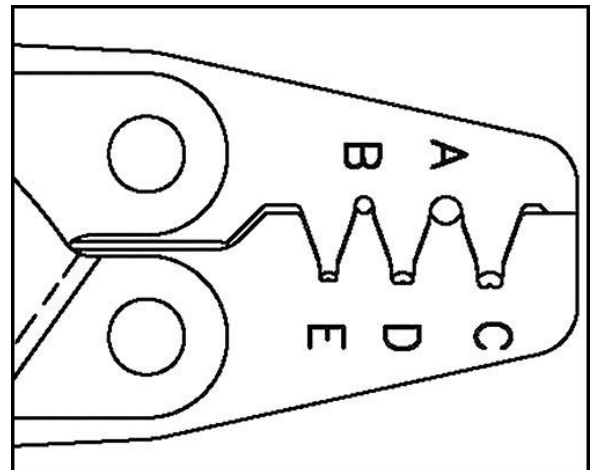

This crimping tool is suitable for crimping the contacts of a Carrot C-32 ECU, plus some more open barrel type contacts. There are 5 options available, 3 for crimping the wire and 2 for crimping the insulation of the wire. The tool must be closed twice to complete a termination.

Large contacts Carrot C-32: Crimp the wire with option D. After this, crimp the insulation first with A, and then with B.

Small contacts Carrot C-32: Crimp the wire with option E. After this, crimp the insulation with B.

Be careful with option A and B, it doesn't need a full press.

Ordering information

Crimping tool Carrot main con. - C-020-0009	€95,-
Main connector Carrot C-32 - C-050-0001	€40,-
