

Datasheet

Pressure sensor 1000kPa

This sensor is designed to measure absolute pressure of various kinds of media e.g. Diesel, gasoline, water, engine oil, transmission oil or air. The sensor has a M10x1 thread for direct fitting. Due to its compact design it is highly suitable in small areas.

Technical Specifications

Measurement range: 0 to 1000kPa

M10x1 thread

Weight: 41g

5V Power supply

O-ring sealing

- Pressure sensor up to 1000kPa
- Suitable for oil or fuel
- M10x1 thread
- Analog output

Connection

Pin 1: Sensor ground

Pin 2: Sensor signal

Pin 3: 5V supply
